Mel:

Thanks for the translations. There aren't quite enough to go around; also I sent one set on to Derbyshire not knowing whether you had. Could I ask Harold or yourself for another dozen (+) copies of the particularly interesting item (headed Acad Sci Kaz SSR, Vestnik 2, 63-70 1957)?

Thanks very much

For some scanty data on dry soils, see Publ. Astron. Soc. Pacific, 70: at 66 (1958). I don't know anything about high altitudes. The soils and microbiology people at Davis might know. (Also there is an interesting old collection of soils in Hilgard Hall someone should look at!)
